

Reading Climate Forum talks about...

Carbon pricing - so polluters pay and people profit

7:45pm - Wed 30th March
RISC, 35-39 London Street,
Reading, RG1 4PS
Free Entry

This is the second of a series of four public presentations on climate change.

Scientists say we are now in a climate emergency, yet CO2 emissions continue to increase. Politicians need grassroots support to take effective measures.

Clive Elsworth of the Citizens Climate Lobby presents **Carbon Fee & Dividend** - a policy that would incentivise rapid decarbonisation while enabling the world's economies to thrive. The evening is designed to be both informative and fun, with role-playing exercises.

This event is promoted by the Greater Reading Environment Network (www.gren.org.uk) with support from the Reading Climate Change Partnership (www.readingclimateaction.org.uk)
